

Trados Studio®

Freelance

The complete translation environment for translation professionals

Trados Studio, the computer-assisted translation (CAT) tool used by over 270,000 translation professionals around the world, offers a complete, unified translation environment for editing, reviewing and managing translation projects and terminology – either offline on a desktop tool or online in the cloud.

Take advantage of a variety of features to help speed up your translation processes and improve your consistency – while building a repository of assets that are yours to use over and over again.

Unleash the power of three

There are three translation technologies at the heart of computer-assisted translation (CAT) software – translation memory (TM), termbase and machine translation (MT). While each of these can be used separately, their real power comes when all three are brought together in a single solution – such as Trados Studio. With these technologies you can deliver high-quality translations quickly while keeping your costs competitive.

TM for maximum translation reuse

Translation memories record and store your translated content, which is then made available for reuse later – helping you to complete translation projects faster. Using translation memories not only increases your productivity, but also drives greater consistency and higher quality within your translated content.

For those who haven't used a TM before, it's very easy to create one in Studio. Using the alignment tool, you can make use of previously translated documents – bringing the original and translated content together to be added to your TM for reuse. You can also use multiple translation memories in Studio – combining your own work with any existing TMs that have been supplied by your client.

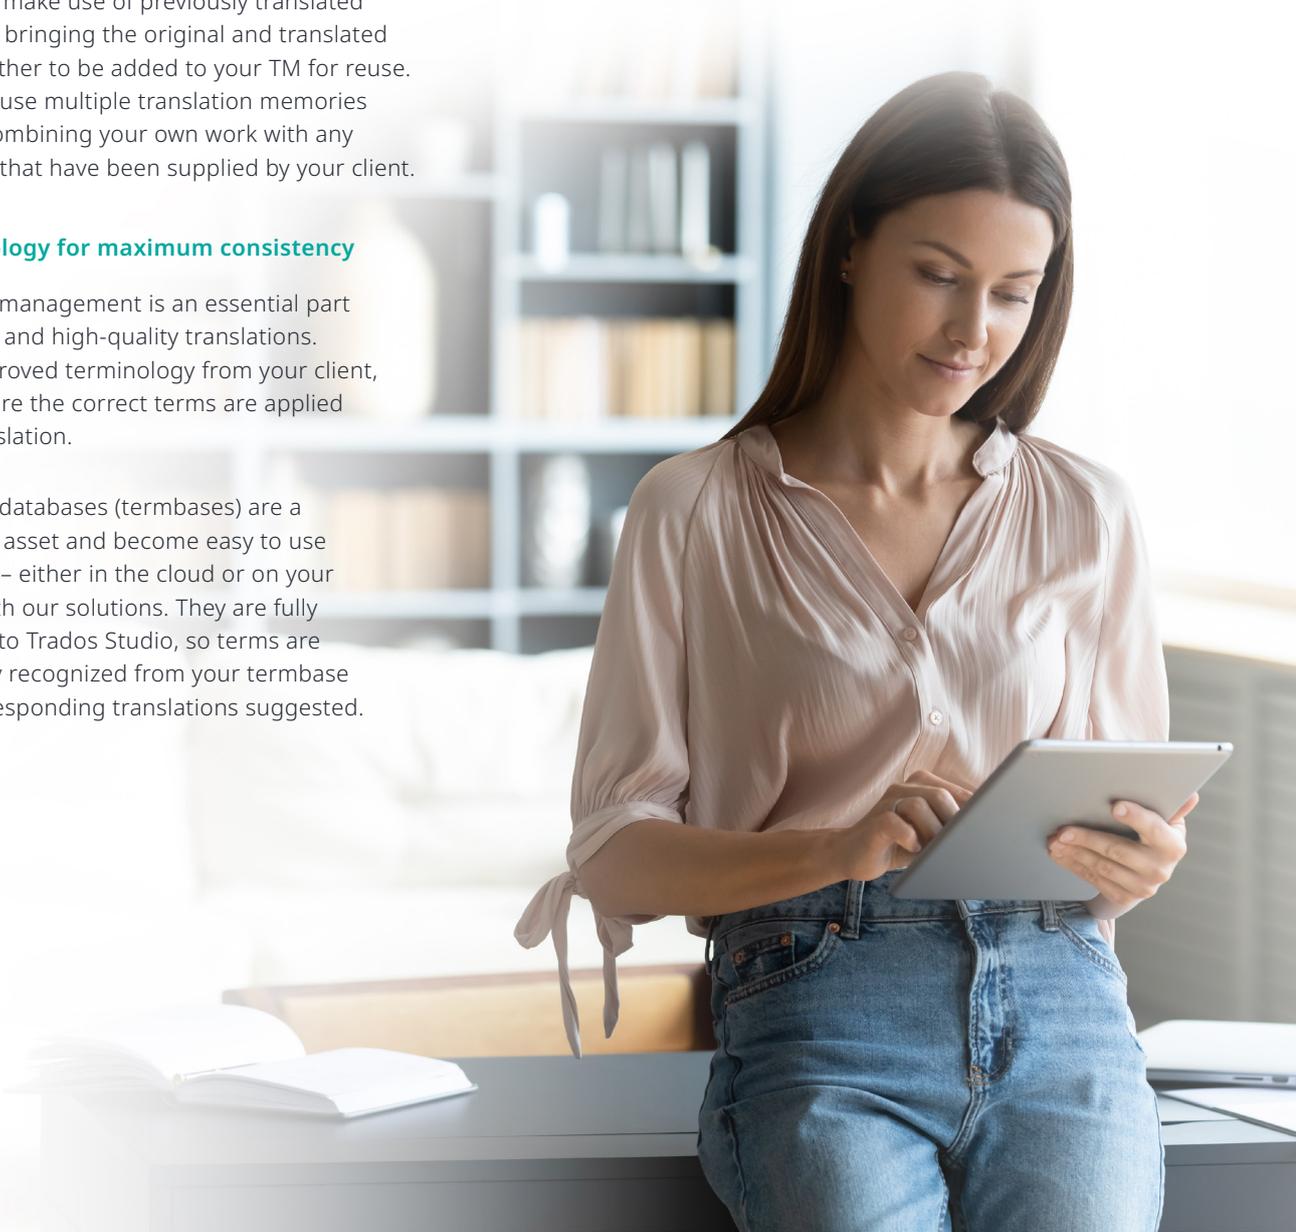

Use terminology for maximum consistency

Terminology management is an essential part of consistent and high-quality translations. By using approved terminology from your client, you can ensure the correct terms are applied to every translation.

Terminology databases (termbases) are a key linguistic asset and become easy to use and manage – either in the cloud or on your desktop – with our solutions. They are fully integrated into Trados Studio, so terms are automatically recognized from your termbase and the corresponding translations suggested.

Work faster with machine translation

Trados Studio is seamlessly integrated with Language Weaver®, our state-of-the-art neural machine translation platform. Available in over 3,000 language combinations, Language Weaver provides high-quality instant translation results from our secure cloud. You can also access countless other MT providers directly from Studio.

Next-generation productivity

Take your productivity to the next level with Trados Studio. You can accept any task and benefit from a range of features to speed up your translation process.

Work with any file type and receive jobs from anyone

We have more than 35 years of expertise supporting different file types, so with Studio you can be confident that all the latest file formats – and other intricacies demanded by often-complex translation workflows – will be supported.

You may receive for translation a whole webpage as an HTML file, a multilingual Excel file, a Word document full of tracked changes, a scanned PDF, or a complete brochure in Adobe InDesign IDML format. Studio supports over 50 file types so you can be sure our software can handle it.

With Studio you may be opening a single file for translation or a package from your client, or perhaps connecting to a shared project on Trados® GroupShare or Trados® Team – our collaboration workspaces for sharing translation assets across teams. You can rest assured that Studio supports all kinds of different working scenarios.

Collaboration has never been easier

If you work as part of a collaborative translation team and receive projects from translation agencies or corporations, Studio is your access point for Trados GroupShare and Trados Team. Through these two project management solutions, your clients can share projects and translation assets with you, project managers can assign specific jobs to you, and you can check out the files and focus on your translation.

With full support for packages generated by Trados Enterprise, Trados Team and Trados GroupShare, you can be confident when working with leading translation service providers or corporations that use our technology.

Work faster than ever

By handling document structure and formatting for you, Studio enables you to focus on what matters most – translating text to the highest quality. It also offers many innovative features to help you work faster and more productively:

- ‘Tell Me’ technology – for instant help and access to functionality and settings
- Neural machine translation (NMT) – connect to Language Weaver to speed up your translations
- Predictive typing – to increase your productivity
- ‘AutoCorrect’ – which works in exactly the same way as in Microsoft Word
- Powerful search – helping you focus on specific parts of the translation

“Now that I have started working with Studio, I have seen a huge difference in my productivity! Spending some time to properly prepare a project, building relevant termbases, leveraging translation memories and aligning legacy documents to build new ones has made me much faster and more efficient.”

Alexandros Tsouris, freelance translator

Work wherever you want. When you want.

72% of translation professionals recognize the need for greater flexibility in how they work to help meet changing industry demands.* Trados Studio gives you that flexibility.

Work on any device, anywhere, anytime

Trados Studio comes with cloud capabilities, providing a unique hybrid experience that allows users to mix desktop-based working in the Studio application with cloud-based translation and project management capabilities via web browser. With the flexibility to move seamlessly between the desktop and cloud environments, you can work anywhere, from any device, at any time.

Choose to access cloud-based projects, files and translation resources through either Trados Studio or any browser. Via browser you also have access to our feature-rich online editor – giving you the freedom to translate and review projects wherever you are.

You can also enjoy the freedom and flexibility to adapt your project workflows depending on the job and your preferred way of working. For instance, you can start a project online on your smartphone if you are on the move, continue working on your desktop for maximum productivity, and then review the file in the dedicated online editor. You can work on any Windows desktop or laptop, or via the browser on your smartphone, tablet or Mac – the choice is yours.

Personalize your Studio workspace

No two translators are the same, so why should your CAT tool be? With Studio there are many ways you can tailor your Studio environment to meet your specific needs and requirements.

Harness the power of the RWS AppStore

The RWS AppStore offers over 250 useful Trados Studio- and MultiTerm-related apps that you can download and manage directly from within Studio.

You can also use the RWS AppStore to extend the functionality of Studio. You will find apps to help you with a range of translation, review and terminology processes – including unusual file format definitions, package analysis tools, or handy apps for dealing with common tasks.

The RWS AppStore is also the starting point for creating your own applications for Studio or MultiTerm. If you can't find an application that suits your needs, you can develop your own using Trados Studio or MultiTerm APIs. To get started, access our full software development kit [here](#).

Customize your Studio workspace

With an intuitive user interface, where tools, commands and help resources are grouped logically, you can find what you need straightaway.

There are lots of ways that you can personalize Studio:

- Easily arrange your workspace windows to provide you with the most effective layout – for example you might choose to place the preview window on a separate monitor, or move the translation editor to the top of the screen.
- Customize your ribbon and mix and match your preferred features across the tabs.
- Choose keyboard shortcuts to suit your style of working.
- Personalize the colours of the editing layout.

Access help and support

When working in Trados Studio, help and support are always at hand. We have a wide variety of free training materials and other resources that will help you to get the most out of Studio – whatever your need.

Help getting started

From the moment you open Studio, you are guided through each area, with tips, tricks and tutorial videos showing you how to create and manage projects, use the translation editor, and get the most out of your translation assets.

We also offer a host of online resources, including:

- Regular webinars
- Video tutorials
- White papers
- Product blogs
- Events with regular networking and training opportunities

Vibrant online community to help you

Access our community forums from inside Studio to quickly and easily get help with our technology whenever you need it. In addition to asking your questions and discussing the use of RWS translation productivity solutions with your peers, you also have direct access to RWS staff who are always on hand to help.
